ADD ON DATA ANALYSIS

MANAGED IT SERVICES

Robust Information Systems have been in the middle east market since 1999 serving and empowering multiple retail business in the region. We pioneer in system integration, and we provide turnkey solution addressing the business without differentiating hardware and software.

## flexible POS for your retail business needs

### CUSTOMER CENTRIC

360-degree visibility on customer transactions and behavior. Loyalty points can be issued and redeemed without needing to have any third-party systems. Customer credit can be issued on any return of items without needing to give a refund for the previous sales. Package discount and other discount rules can be applied on sales.

### CREDIT CARD PROCESSING

Choose your credit card processor to get the best rates and minimize on-going expenses. Any local credit card providers can help us integrated with RE to have flexibility in connected to local payment gateway systems.

### MOBILE POS

Mobile solutions to sell anytime, anywhere even when disconnected from the Internet.

### WEB INTEGRATIONS (ecommerce)

Integrate your business with the web for real-time order processing and item management.

### LOCAL DATABASE

Your data is kept locally though synchronization across the store is done through an encrypted data flow. Published API can be used to integrate RetailEdge with any other systems.
